

AthLEAN-X STRIPPED

Workouts WEEKS 5-7

“THE RULES OF THE GAME”

Be sure to follow the following rules when performing the workouts for WEEKS 5-7 of the AthLEAN-X Training System

- ★ When choosing how much weight to use, be sure to use an amount of weight that allows you to complete the prescribed number of reps in good form. You should find the last repetition of the set to require nearly maximum effort to complete.
- ★ If the last repetition is too easy and you find that you can complete at least 2 or 3 more, increase the load on all subsequent sets.
- ★ If you are unable to complete the prescribed number of reps on a set, lighten the load accordingly on all subsequent sets to prevent this from happening again.
- ★ Rest time between all sets in these 3 weeks of workouts is 30-45 seconds to really pick up the pace and rev up the metabolism. Core exercises remain 30 seconds rest between each set.
- ★ Repetition cadence should be 1-2 seconds on the concentric, slight pause, and then 3 seconds on the eccentric portion.
- ★ Perform all sets for each exercise before moving onto the next exercise in the workout.
- ★ Perform all conditioning drills with the best footwork, effort, and determination you can for best results.

AND LAST BUT NOT LEAST

- ★ *Remember....as the old saying goes...there is no elevator to success. You have to take the stairs!
By now you should be stepping up them two at a time!*
